X-SVLen

Input:

ONT based SV callset using cuteSV

Truvari run using default and permissive params

hg37

TrioCanu assemblies

Method:

For each SV defined by chrom, pos, variant:

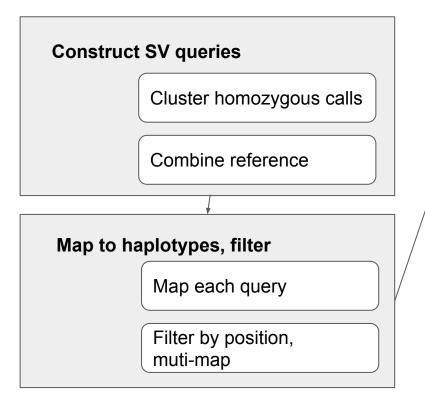

Construct a query as:

ref[chrom][pos-prefix:pos] + SV + ref[chrom][pos:pos+suffix]

prefix SV suffix

Map all queries to hap1 and hap2 assemblies.

Workflow

Select best alignment from haplotypes, refine breakpoints

Find "solid" flanking region around SV.

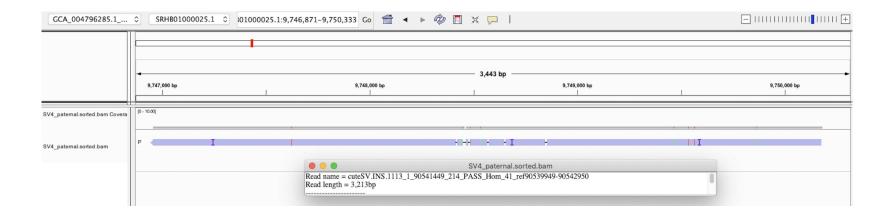

Compare SV Length

Compare SV Sequence (ins)

Assembly calls that overlap contigs.

| SVType | IN | IS | D | EL |
|------------------------------------|-------|-----------|-------|------|
| SVLen | <50 | >=50 | <50 | >=50 |
| number of these calls that overlap | | | | |
| assembly contigs | 16054 | 17481 | 30494 | 6475 |

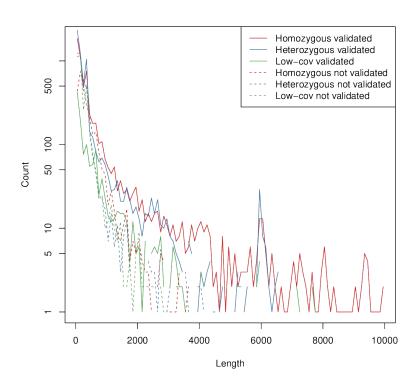

Mapped query sequence

Example difficult to validate call.

Annotation of true positives

Comparison against Truvari

| SVType | INS | | DEL | | |
|---------------------------|---------------|---------------|---------------|---------------|--|
| SVLen | <50 | >=50 | <50 | >=50 | |
| | 3351 FP | 2835 FP | 880 FP | 1571 FP | |
| number of truvari | 7200 TP | 4095 TP | 1925 TP | 2099 TP | |
| TP/FP/no-call | 15974 | 80 | 30196 | 298 | |
| | not_processed | not_processed | not_processed | not_processed | |
| number of | 5220 FP | 8979 FP | 23202 FP | 3444 FP | |
| assembly TP/FP/no-call | 10834 TP | 8502 TP | 7292 TP | 3031 TP | |

Thank you!!
